About Us

Virtualdeveloper.com, LLC are subject matter experts pioneering the healthcare industry with cloud based blockchain technologies. Our state of the art blockchain technology services can help you integrate clinical records on to a regulatory compliant platform. We are passionate about supplying the healthcare industry with the tools needed to securely manage patient data, enhance patient outcomes, and increase overall efficiency. We have expertise securely deploying medical records to either a centralized or decentralized platform.

United Therapeutics CORPORATION

"Thanks for helping us dramatically lower our total cost of ownership by migrating our computer workloads from on site to the cloud. Not only are our infrastructures and applications easier to manage and more secure, but we are also able to scale just in time to meet increased patient demand."

- Helena Melke, Project Manager

Train Now MD

"virtualdeveloper.com helped us create a new communication platform to share sensitive patient data in an interactive manner for teaching purposes."
-Dr. Mara De La Vega, Medical Director

ACADEMY OF REGENERATIVE PRACTICES

"Without virtualdeveloper.com, LLC we would still be in the Stone Age with paper records. They created an EMR for us that well surpassed expectations!"
-Dr. Carlos E. Mercado, Lead Physician
