

TOOLS AND TECHNOLOGIES: OFFICE 365

We have significant experience implementing the following for our clients:

- Managed client system's security and data compliance through the Office 365 Protection Center.
- Architected solutions to leverage server and client-side JavaScript Office 365 and Yammer APIs with oAUTH and SAML.
- Integrated Office 365 subscriptions with Azure Directory services.
- Boosted client's business productivity by integrating their enterprise application with Office 365 using APIs for mail, calendar, files and contacts.
